

CAMBRIDGE PARK, NSW

🏠 3 🛒 1 🚗 2

Project Overview

Demolition of existing structures, construction of 4x two storey townhouses, associated landscaping, easement and drainage works.

Development application requires the submission of a detailed stormwater drainage design demonstrating that it is physically possible to discharge of stormwater through downstream properties via an adequately sized PVC pipe.

Thomas Property - Project Management Team have been appointed to provide the following information in the detailed stormwater drainage design:

* Existing utility services must be located accurately by the Surveyor and their exact size and depth determined;

* Superimpose the DA approved proposed works along the southern boundary of 43 College Street, such as, the basement car park wall (likely to be cored piles with shotcrete walls),

Construction & Project

Type : Land
Sold Date : Tuesday, 26th March 2019
Land : 923 m2
